

## Below is a workshop price menu of the typical work undertaken. From Cycle Tech

The price menu should be used as a guide, as Cycle Tech UK cannot give quotes (or even vague estimations) without seeing your bike. Whilst a good majority of what our mobile workshop does is unique to the individual requirements of each repair Cycle Tech UK see's, we operate a fixed menu servicing system for general routine servicing tasks.

There is a minimum charge/callout of £15.00 which is not added to the bill if labour is more than £15.00

There may be a travel charge, for outside of a 5 mile working radius. The charge would be 45p/mile for total mileage. Example 20 miles = £9.00 If I am working in your area, then there is no charge.

If your bicycle is in a dirty condition there may be a charge for cleaning to allow for closer inspection of the frame and components.

### **Price Menu Prices from:**

#### **Servicing**

All work completed to **Cycle Tech UK's standards of practice.**

Service recommended every 12 months or 100 riding hours (Whichever is sooner) and a Safety inspection with brake, gear service every 6 months.
